NEW! Ultra Small Ceramic Low Pass Filters

DC-5400 MHz

Unbelievably, with their low profile, miniature size (0.15"x0.15"x.028")  our new LFTC series of low pass filters can handle more than 10 watts and cover cut off frequencies up to 6 GHz. Because of its extremely small size, low cost and excellent performance, it is so easy and trouble free to include these new low pass filters in your design.

Great for applications dealing with rejection of harmonics, intermods, and avoiding unwanted signals from creeping into your system. Because of our advanced manufacturing processes, high volume-fast delivery is our specialty! Custom requirements are standard practice at Mini-Circuits, with a quick response to meet the specifications of the project you are working on!

So contact Mini-Circuits, our team is ready to work with your team worldwide.

In Stock, priced from \$3.75ea. (Qty. 10-49)

Our new family has five models now with more coming!
