

Press Release
MMIC AMPLIFIERS
DC-10GHz

Mini-Circuits proudly introduces the NEW family of 'LEE' MMIC Amplifiers. Highly reliable, extremely broad band, and very low in cost. These amplifiers have excellent electrical performance, with up to 17.3 dBm flat output power to 10 GHz. There are five models being introduced in this new Mini-Circuits family. Housed in a leadless 3x3mm Low Profile™ (MCLPTM) package with exposed metal bottom for superior grounding and heat dissipation. High reliability and repeatability, that you can count on. They're ideal for the cellular, PCS, communication receivers & transmitters as well as for satellite communication and military applications. So contact Mini-Circuits now. Our team is ready to handle your needs worldwide with quick shipments, custom designs, high volume production capability, and fast turn-around. Price: From \$1.19 ea. (Qty. 25)
